Milan, Italy

FOREWORD

It is with great pleasure that Humanitas Research Hospital and Hunimed - Humanitas University announce a series of cadaver hands-on ESD and third space therapeutic endoscopy workshops in the training centers of the Humanitas University, Milan.

Advanced therapeutic techniques are increasingly practiced in Europe with a growing need for intensive individual training. We have developed a training program to master submucosal dissections and third space therapeutic endoscopy (POEM, STER) in the most realistic setting possible, using cadaver models.

Next to hands-on, the management of potential complications such as perforations will be taught under the guidance of an international faculty consisting of renowned experts in the field.

This is the first time that the entire team (physician and her/his nurse) can be involved in a training course to get used to the most innovative and recent devices, and to get the basis to establish at home a safe and effective setting to start ESD and third space therapeutic endoscopy.

We hope that this unique workshop will serve the need for advanced training in this exciting and developing area of interventional endoscopy.

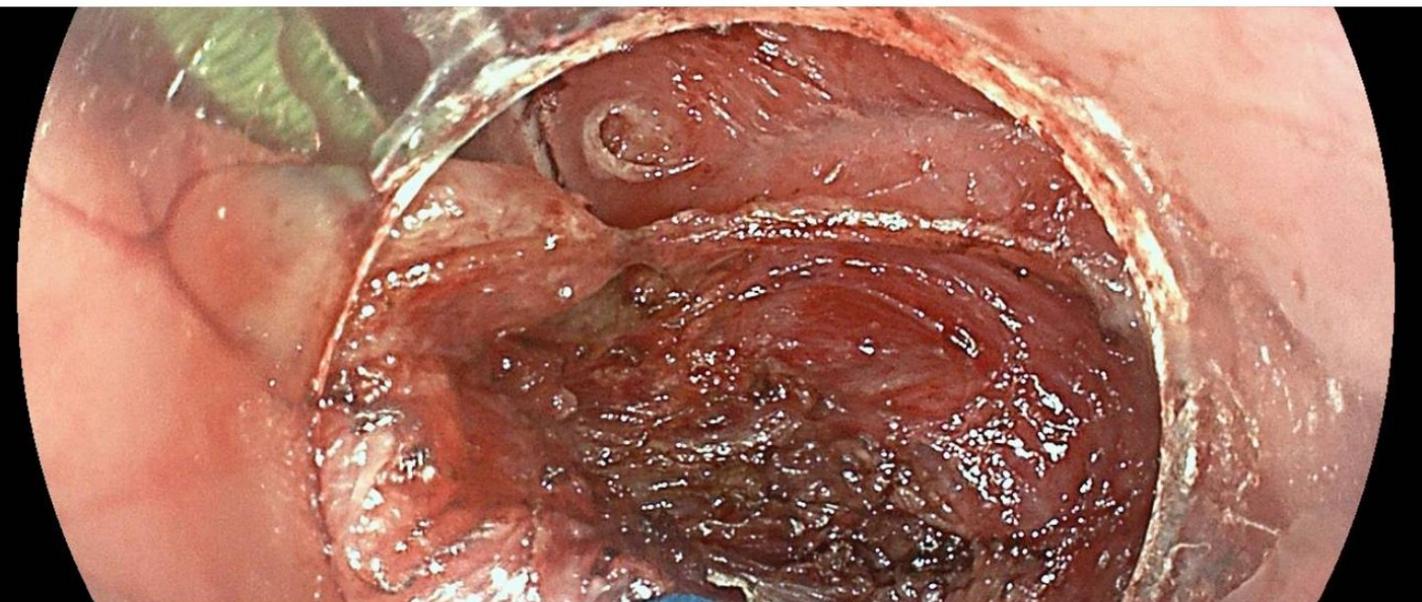

Looking forward to seeing you join us!

WHO IS THIS COURSE FOR?

- This course is designed to train advanced GI endoscopists and surgeons who are interested in learning the most advanced resection techniques in a real-life clinical setting.
- This course will provide you and your entire team with tools to develop your very own Advanced Therapeutic Endoscopic Resection Unit and Resection program

OVERVIEW

- ESD Basics – Faculty presentations covering indications, methods and technique variations.
- ESD technique demonstration – Video-assisted and live demo cadaveric models by ESD experts.
- Intensive hands-on experience – Direct guidance from expert faculty and exposure to ESD knives, traction and suturing devices.
- Dedicated ex-vivo stations – Available to participants for the entire course duration to familiarize them with the procedure.
- Dedicated Submucosal Endoscopy Cinema room – Videos on technique, "Tips & Tricks", "Do's & Don'ts" made available for the entire course duration.

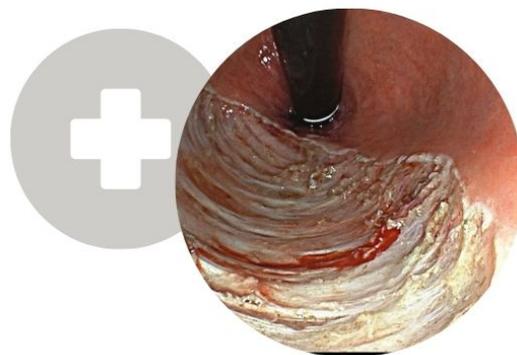

COURSE DESCRIPTION

- 3 Fully equipped cadaver model workstations
- Limited participation (3 + 3 per workstation)
- Eight hours of hands-on training per team
- One-on-one hands-on instructions and teaching from highly skilled experts in the field

VENUE

- Humanitas simulation center
- Via Rita Levi Montalcini, 4, 20090 Pieve Emanuele MI
- Hotel accommodation includes one night

PROGRAM

DAY 1

11.00 AM	Arrival (not organized) Registration & Coffee
11.15 AM	Introduction & Course Overview
11.30 AM	Techniques of ESD, Third Space Endoscopy, Demonstration of Procedure (videos)
12.30 PM	Diathermy Considerations
12.45 PM	Traction consideration - Tips & Tricks
1.00 PM	Endosuturing Consideration Coffee Break
1.15 PM	Lunch
1.45 PM	Transfer to the cadaver lab and preparation
2.00 - 7.00 PM	Hands on Lab I (Coffee Station for Breaks will be available during the entire course)
7.00 PM	Closure of day 1. Transfer to hotel.

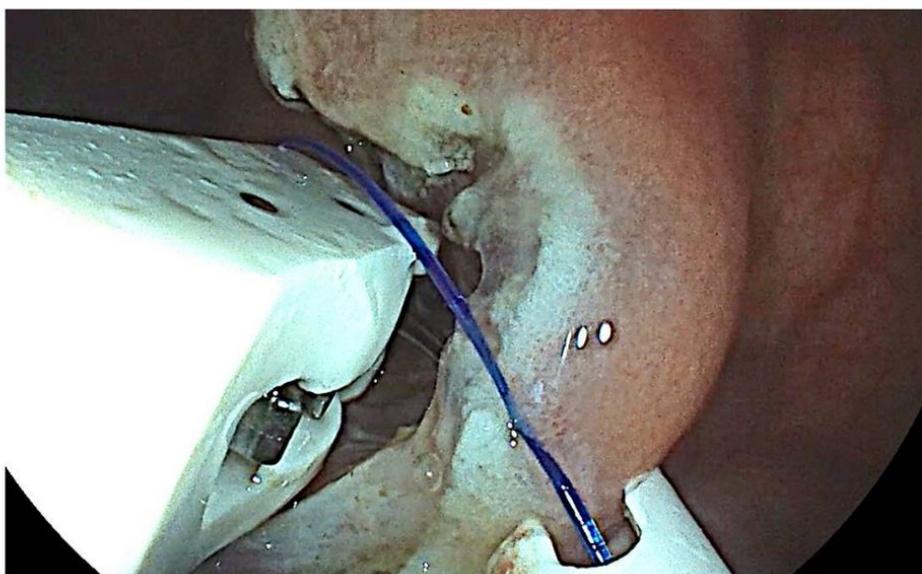

From the hotel, transfer to the restaurant (9 PM) and later from the restaurant back to the hotel

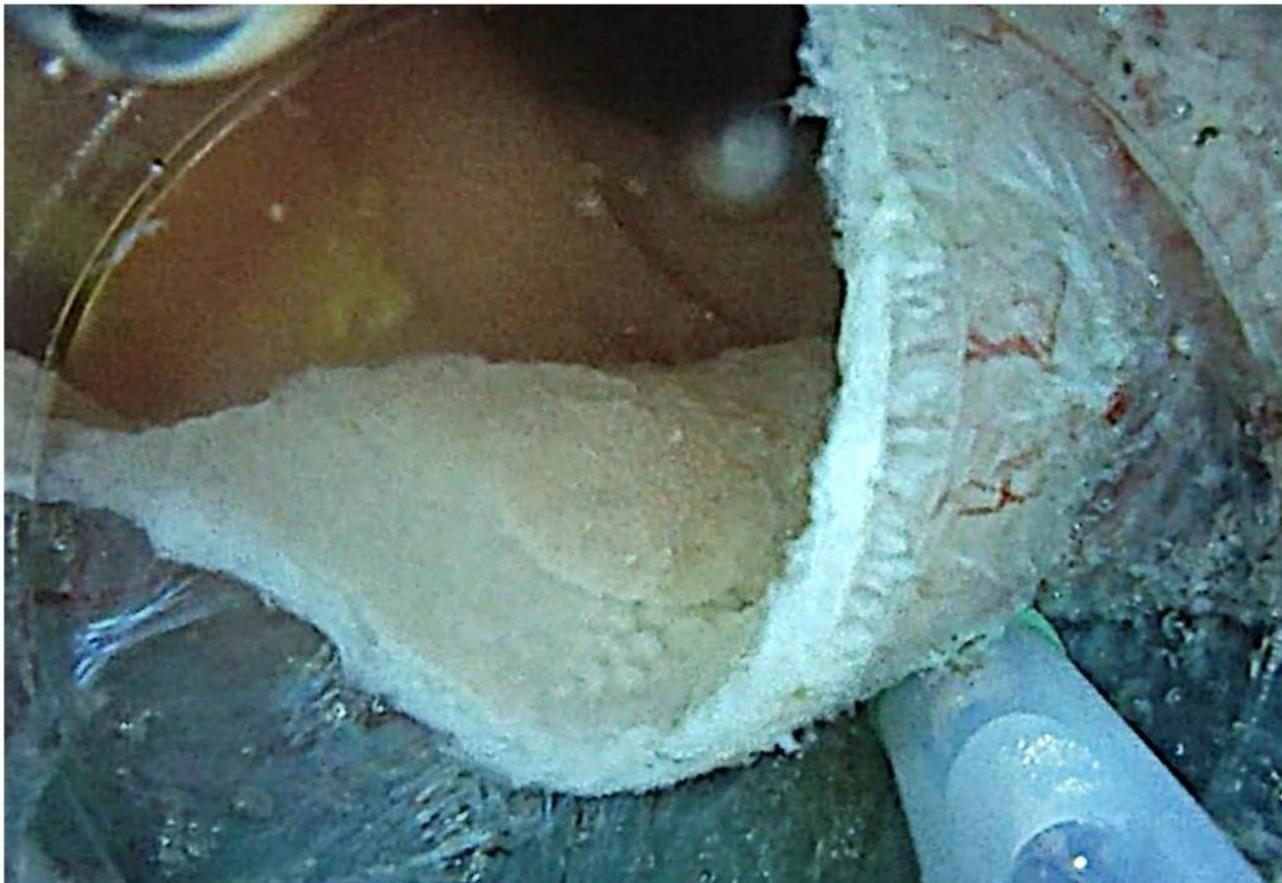

PROGRAM

DAY 2

- 8.00 AM **Transfer from the hotel**
- 8.20 AM **Arrival, Transfer to the cadaver lab and preparation**
- 8.30 AM **Hands on Lab II**
- 12.30 PM **Closure of day 2**

REGISTRATION

FEES:

Physician + Nurse 2000 € + VAT

The fees cover course participation, coffee breaks, lunches, dinner on the first day, workshop material, Hotel accommodation.
