BLENDED EVENT

ADVANCED HANDS-ON COURSE IN PANCREATIC SURGERY

6° Edition

**e-learning session:
from 1st May to 6th June
hands-on session in Milan:
7th June**

Course Director
Prof. Alessandro Zerbi

Director, Division of Pancreatic Surgery,
Humanitas Research Hospital

BACKGROUND

Pancreatic surgery is increasingly becoming a specialistic branch of abdominal surgery, requiring specific cultural and technical competences.

Whereas many courses and meetings are focused on the complex cultural aspects of pancreatic surgery (indications, intra-operative choices, post-operative management, etc), little attention is paid to technical details and to the execution of surgical procedures as a first surgeon, due to the poor availability of dedicated resources.

The introduction of the minimally invasive approach makes it even more difficult to acquire all the technical competences needed to adequately face this challenging surgery. Consequently, there is a strong need for hands-on courses where participants have the chance to personally perform both open and laparoscopic pancreatic resections under the guidance of an expert pancreatic surgeon, in order to improve their own surgical burden.

Our course, held in a well-established cadaver lab and based on the experience of high-volume pancreatic surgeons, is the answer to this need. It is targeted to surgeons interested in pancreatic surgery, who have already gained some experience in this field and wish to improve.

Course Director

Alessandro Zerbi

Director, Division of Pancreatic Surgery,
Humanitas Research Hospital, Full
Professor in Surgery, Humanitas University

E-LEARNING SESSION, From 1st May to 6th June 2024

Introduction **Prof. A. Zerbi**

Pre-operative prophylaxes in pancreatic surgery Short videos showing the main critical aspects of pancreatoduodenectomy

- patient positioning and incision
- Kocher manoeuvre and SMA exposure
- SVM isolation
- hepatic hilum dissection and lymphadenectomy
- pancreas transection
- uncinate process and mesopancreas dissection
- accessory right HA preservation
- pancreato-jejunal anastomosis
- round ligament interposition
- biliary and digestive anastomosis
- drains positioning

Post-operative management based on ICH-ERAS protocols Short videos showing the main critical aspects of laparoscopic distal pancreatectomy

- patient positioning and port placement
- exposure of the pancreas
- isolation of splenic vein
- isolation of splenic artery
- pancreas transection
- splenic vessels preservation
- specimen removal
- drains positioning

HANDS-ON SESSION IN MILAN, 7th June 2024

08.30 - 12.30

Hands-on session on cadaver
Pancreatoduodenectomy with
pancreato-jejunal anastomosis

12.30 - 13.15

Light lunch

13.15 - 16.30

Hands-on session on cadaver
Laparoscopic distal pancreatectomy

16.30 - 17.00

Final discussion

PARTICIPANTS

The course will be composed by a theoretical part as an e-learning course on our platform and a practical session on June 7th 2024. The theoretical part will be accessible starting from May 1st and must be completed by the practical session. During the hands-on session, two participants will be allocated per workstation with a fresh frozen human specimen available and, working together, will personally perform both open and laparoscopic pancreatic resections under the guidance of an expert pancreatic surgeon.

REGISTRATION FEE

€ 1.200,00 + VAT (€1464,00 VAT included)

REGISTRATION FEE with accommodation

€ 1.300,00 + VAT (€ 1.586,00 VAT included)

Accommodation is for the night of 6th June 2024 in a DUS room with B&B service (5 min. walk to venue).

REGISTRATION FEES INCLUDE

- Course kit including certificate of attendance
- Catering as shown in the program

HOW TO REGISTER

Registration is possible online at www.humanitasedu.it
